Newport, July 11 .- The exercises of the third day of the American Institute of Instruction were opened with devotional exercises, conducted by the Rev. W. R. Alger. Miss W. Bertha Hintz, of the Boston Normal School, then delivered a lecture on "Drawing in Schools." She made an able plea for the greater use of the blackboard in teaching little children. Pictures. she said, add interest to a lesson and make the subject more vivid to the imagination of the child. Miss Hintz made a few rapid sketches on the blackboard and much interest was manifested, showing the advantage of "chalk talks," even with adults. Miss Hintz was followed by Professor A. E. Dolbear, of Tufts College, who spoke on "Recent Advances in Electrical Science. He said in part:

" If there was but one kind of matter in the universe there could be no electricity; and second, that the phenomenon called electrification is due to the molecules being thrown into abnormal positions and the propagation from molecule to molecule by contact of this same abnormal position, constitute what is called THE QUARREL OF THE DOCTORS.

A GERMAN NEWSPAPER TAKES THE SIDE OF from an electrified body represent transformed electri-; cal motions, and such effects of electricity ought not to be confounded with electricity. One difficulty that has been felt by many about the fluid hypothesis or any point in it let it be twisted by the name. It was to seen to have a right-handed twist travelling in one direction and a left-handed twist in the opposite direction, and each through the whole length of the rope, both co-existing without interference, yet nothing an advance, if made by the other lines.

A desire for peace and, or an advance by it would not it as the aggressor, an advance by it would not it as the aggressor, an advance by it would not it as the aggressor, an advance by it would not it as the aggressor, an advance by it would not it as the aggressor, an advance by it would not it as the aggressor, an advance by it would not it as the aggressor, an advance by it would not it as the aggressor, an advance by it would not it as the aggressor, an advance by it would not it as the aggressor, an advance by it would not it as the aggressor, an advance by it would not it as the aggressor, an advance by it would not it as the aggressor, an advance by it would not it as the aggressor. The would not interference by it would not be interference by it would not b

organic life. "No one," the hotor sant, can analy his work without being struck with the analogy between the world of the biologist and the world of the teacher. In the first place, it is important to observe that character is a product of growth and not of manifacture. Whatever influence, therefore, a teacher wishes to bring to bear on the character of his punit must go deep enough to touch the springs of his life; otherwise it has no real or permanent influence on character."

-AN OFFIR DECLINED.

London, July 11.—At the meeting of the Pan-Preshelm Council today, the Rev. G. D. Markeys, of Curber, in accepting the office of permanent secretary to which he was appointed by the Council, thanked to devote the rest of his life to the work.

The purpose of this convention is to enable supe perintendent Jones, of the Illinois Central. "Is not of so much importance on the castern railroads, where all trains on one track run in the same direction, for a train may be started and left to itself till it reaches its destination, but in the west, where the single-track system prevails, every train on its way must be followed and kept track of from the time it leaves one junction till it, peaches the next. This necessitates a wire for every new train put on a line."

ball two feet in diameter whenever a passenger train ball two feet in diameter whenever a passenger train about to cross the bridge has arrived within one miles thereof. The ball will be kept raised until the train has crossed the bridge. Captains of vessels are cantioned not to pass the distance posts when the ball is raised, under penalty of \$100 and damages incurred to the company's property. This notice contains many good features, and will be the means of preventing the vexations delays to commuters who daily use the road.

LITTLE CHANGE IN ANY ROUTE TO THE WEST.

The all-rail rates to the West continue to be well held by the roads in spite of the efforts of shippers to secure concessions. The secret of their strength probably lies in the fact that the bounge moving is too light to warrant quarrelling over through the season of water navigation. There has been a ve. duction in rail total. season of water navigation. There has been a re-duction in rail rates on tobasco from Louisville to New-York from 35 to 271-2 cents per 100 pounds. It is denied, however, that this is a cut, the reduction being made by general agreement of all the roads.

The rail and lake routes to the West were un-changed yesterday and there is more talk of im-The found the Emperor, scaled in a chair in a suffocating condition. It is said that the moment the operation of truckestomy was performed the Emperor's breathing was labored, his lips were livid, and his voice had lost its tone. His speech was next time.

> A FASTER PERRYBOAT TO SANDY HOOK. The New-Jersey Southern Railroad Company's new steamboat Monmouth, which was built by Cramp & and address. Sons, is expected to arrive early this morning. She is to run during "commission" hours between Sandy Hook and this city, having much better accommedations for passengers than the St. Johns, the best at present plying on that route. The latter long will be present plying on that route. The latter long will be present plying on the midday trips when the traffic is not beaver. The Mannault on her traffic is samulay, the latter long trips when the traffic is samulay, the latter long trips when the traffic is samulay, the latter long trips when the traffic is samulay to be a state of the latter long trips. not heavy. The Monmouth on her trial trip showed a speed of seventeen knots or nineteen and out-half the latest and it is expected that when her Relatives to the latest and the latest an machinery is in good working order she will be one of the fastest ferryboats in the harbor. The naw boat is 286 feet in length and 45 feet beam and is fitted with all the latest improvements for passenger accommodation, and the latest and most approved machinery.

RATE-MAKING FOR THE NEW TARIFF. Chairman Smith, of the Transcontinental Association, is in the city on a brief visit to get help in rate-making for the new transcontinental tariff. The Denver Chamber of Commerce has called for an equalization of these rates under the Interstate Commerce law and the roads are framing their tarilf to raise some of the extremely low rates rather than to lower the whole range. It will be some time before the work will be completed.

MISCELLANEOUS RAILWAY INTELLIGENCE. Chicago, July 11.-General Manager E. T. Jeffery, of the Illinois Central, went to Jackson, Miss., last evening the have a conference with the Relirond Commissioners a the commission about a year ago. When these rates were put in effect the Illinois Central accepted them under protest and demanded that they should be revised, as it could not make expenses on those rates. The commisstoners having falled to take any action in the matter, the Hitnels Central a short time ago act uside the commisigners' tariff and adopted rates of from 20 per cout to 50 per cent higher than the State tariff. Portland, Ore., July 11.-The Oregon Rallway and

Navigation Company's new from raffroad bridge was THE RUNNING OF TRAINS ON SINGLE TRACKS.

The Railway Telegraph Superintendents epened their annual convention yesterday morning at their headquarters at the Murray Hill Hotel. A meeting

means the exact whereabouts of a train may be always known. Still this department of inilway management is daily assuming more importance, so that we are constantly kept busy keeping up with the times. There is a room at their headquarters for time exhibition of new inventions and appliances in telegraphy, and the members of the convention devote most of their time to inspecting these. The convention will continue for three days.

SIGNALS AT THE ERIE RAILWAY BRIDGE. The Eric Railway has issued a notice calling the attention of the captains of versels navigating the Hackensuck River to the fact that distance posts have been placed or each side of the company's bridge 500 yards therefrom, and upon the drawbridge a pole thirty feet high has been erected, from which will be suspended a ball two feet in diameter whenever a passenger train
